

A Simplified Experience for Adding Respondents on CHADIS!

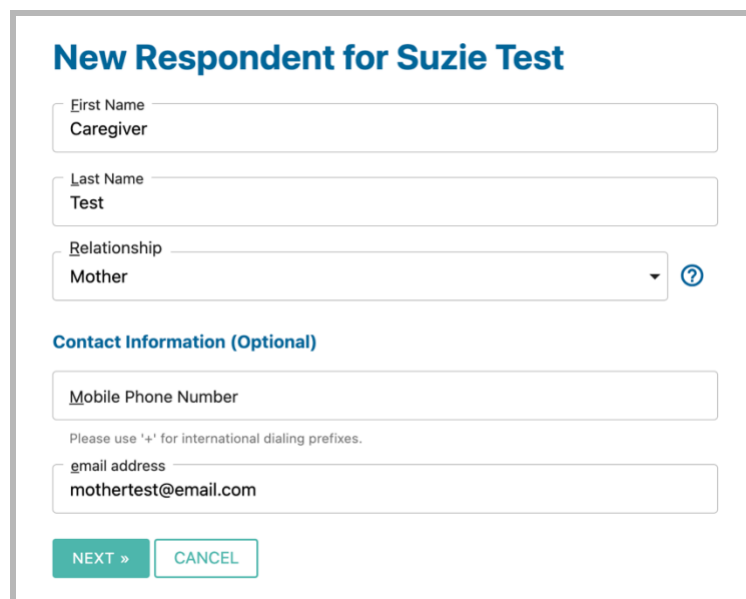

Add Respondent

Easily add a new respondent (caregiver, teacher, or teen) with one simplified workflow:

Respondents	
view invitations	
Father Test	Father >
Mother Test	Mother >

Fill out the respondent's name and relationship. Add contact information to send them a registration link.

New Respondent for Suzie Test

First Name
Caregiver

Last Name
Test

Relationship
Mother

Contact Information (Optional)

Mobile Phone Number

Please use '+' for international dialing prefixes.

email address
mothertest@email.com

NEXT » CANCEL

If you previously used:

add new: If you previously used 'add new,' our new workflow allows you to add the respondent, assign questionnaires, and send them a registration message. You can still reset their password and provide it to them using the **Respondent Options**.

invite: If you previously used 'invite,' our new workflow will allow you to add the respondent, assign questionnaires, and send them a registration (invitation) message. If they decide not to use CHADIS, simply remove the respondent and they will not be contacted again.

quick-enroll

If you previously used quick-enroll, our new workflow will allow you to add the respondent, assign questionnaires, and send them a registration message. Adding contact information is optional and the waiting room options will immediately be available in the **Respondent Options**.

Respondent Options

The Respondent page provides quick access to assign questionnaires, use the CHADIS Waiting Room options, or adjust account settings.

The screenshot shows the 'Respondent Options' page for a user named 'Caregiver Test'. The user's role is 'Mother' of 'Suzie Test' with the email 'mothertest@email.com'. There are two buttons: 'Legal Guardian' and 'Can Invite Others'. Below this is a 'Waiting Room' section with four options: 'Auto-assign Questionnaires (0 assigned)', 'Login Switch', 'Device Switch', and 'Send Device Switch Message'. A red arrow points to the 'Auto-assign Questionnaires' option. Below the 'Waiting Room' is an 'Account Settings' section with three options: 'Reset this User's Password', 'Re-send Registration Link', and 'Change this User's Username' (with the email 'mothertest@email.com' displayed below it).

Connect Existing Respondents

If the respondent already exists for another patient (e.g. a parent with another child at the office), you can now link them directly to the new patient through this simplified experience.

The screenshot shows a dialog box titled 'Respondent Already Exists'. The text inside reads: 'We found a respondent in your office that matches the information you provided. Would you like to connect them to your patient?'. Below the text is a card for 'Caregiver Test' with the email 'mothertest@email.com' and a green 'Connect' button. At the bottom left of the dialog is a link that says 'Go back to the patient'.
