

REFERRAL & CARE COORDINATION FEATURE

The process of making referrals and receiving follow-up information can be daunting, but CHADIS can make the process pain free.

CHADIS Care Coordination & Referral Module

- Facilitates referrals and coordination between CHADIS providers and community organizations in a direct and efficient manner.
- Providers send and receive referrals via email and share CHADIS reports, comments, status-of-service updates, and graphical co-monitoring of some outcomes.
- The online consent form documents the patient's consent to share information and be contacted by the receiving provider.
- CHADIS provides a referral dashboard and automatically notifies providers of changes to ongoing referrals.
- Is a system to track referrals made through the Care Coordination functionality

Sending a CHADIS Care Coordination Referral is Efficient and Convenient.

- Choose 'Create Referral' in CHADIS
- Obtain consent (verbal or written)
- Fill out form
 - Names of referring and receiving providers
 - Patient name
 - Patient health insurance information
 - Relevant reports and comments
- Send form via email or fax

Receiving a CHADIS Referral is Easy.

- Receive referral via email or fax
- Accept or decline referral or post a comment
- If you accept the referral
 - update the referral
 - track appointment
 - post comments and notes
 - mark consultation as done
